

Service Plans

Plans and Pricing

The starter plan covers three projects and 10 gigabytes of storage at 29 dollars per month.

The business plan covers unlimited projects and 1 terabyte at 149 dollars per month with priority support.

Annual billing grants two months free on every plan.

Uptime Guarantee

The service commits to 99.9 percent monthly availability across the business plan and above.

Downtime beyond the commitment earns a service credit worth 10 percent of the monthly fee per hour.

Planned maintenance windows are published seven days in advance and never count against the guarantee.

Support Channels

Business plans include a dedicated support channel with a response target of four business hours.

All plans get self-service help centre articles and a community forum monitored by the engineering team.

Phone support is reserved for enterprise contracts only.

Data Retention

Customer data is retained for the duration of the active subscription and deleted within 30 days of cancellation.

Backups are kept for 14 days using encrypted storage and are restorable on request.

Logs and metrics are stored up to 90 days and are not shared with any third party.

Security Compliance

All customer data is encrypted in transit and at rest using industry standard TLS and AES-256.

The platform undergoes an independent penetration test twice a year and a SOC 2 audit annually.

Subprocessors list is published on the trust page and customers are notified 30 days before a change.

Migration Onboarding

Migration to the service includes a free import of up to 50 gigabytes of existing data.

A dedicated onboarding engineer supports the first deployment for business plans and above.

Migration happens at a scheduled window and always keeps the old environment available as a rollback.
